PRODUCT LINE OVERVIEW

Milliken's CoFlex TLC® two layer compression kits are designed to enhance the experience of both the clinician and patient.

Clinicians can choose from a wide variety of options to best solve their patients' needs with the same easy application.

Patients will enjoy the comfort and mobility the systems provide which has been known to increase compliance.

You can trust that Milliken's Made in the USA quality products will help deliver a streamlined approach and excellent care in the treatment of venous leg ulcers.

THE COFLEX TLC DIFFERENCE

Ease of Use

- Offers a comprehensive family of products
- Two-step, quick, easy application
- Promotes safety through consistent application across entire line
- Features EasyTear technology for convenience

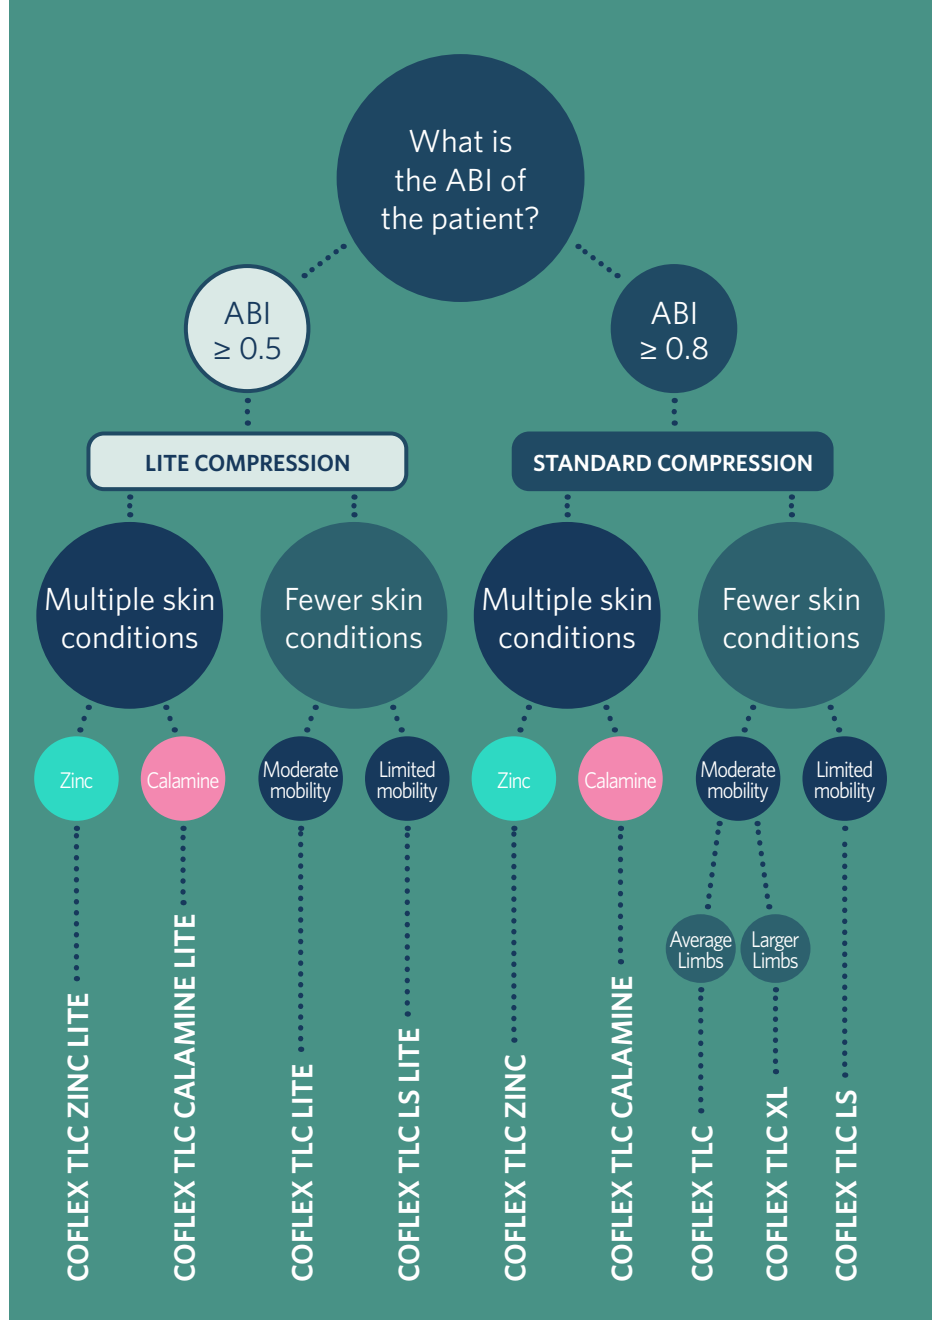

Patient Comfort

- Stays in place
- Provides comfort during wear
- Conforms to patient's anatomy
- Dry options have odour and itch control, Zinc/Calamine options have soothing effect on irritated skin
- Promotes longer wear time with high vapor transfer rate

Effective Compression

- Features visual indicators to guide intended compression
- Provides restorative compression for patient needs

Milliken's CoFlex TLC, Zinc, Calamine and Long Stretch kits portfolio provides a two-step level of comfort and healing unlike any other two-layer compression on the market, including odour and itch control.

SOOTHES
+ CALMS

COFLEX TLC
ZINC

COFLEX TLC
CALAMINE

COFLEX TLC ZINC & CALAMINE

Milliken's CoFlex TLC Zinc and Calamine kits are designed to simplify and streamline the clinician's job while providing comfort to the patients.

- Soothes and calms skin with multiple skin conditions
- 50% more Zinc or Calamine than traditional Unna Boots
- Visual indicators to guide restorative compression application
- Comfortable and breathable
- Non-slip support
- Easy to apply
- Nylon stocking included in each kit
