Our Company

GDP Compliance Ltd

Makers of **G**ood **D**isinfectant **P**roducts

GDP Compliance Ltd “Makers of Good Disinfectant Products” is a UK-based company with a team of highly skilled and experienced Pharmaceutical and technical professionals collectively with over 450 years of experience in healthcare and Pharmaceutical manufacturing.

GDP Compliance Ltd is a healthcare passionately supplying the global healthcare market with high quality disinfectant products. Our constantly growing portfolio is backed by the state of the art inhouse R&D capabilities in personal care solutions. GDP Compliance makes a substantial contribution towards protecting people's health and use innovation and science as our driving force.

We are passionate about quality and regulatory compliance; our mission is to provide customers with products of the very highest quality with lowest adversities. Safety and satisfaction of our customers is paramount to us. Customers using Aseptic can be assured of an exceptional and effective product.

Key features of GDP Compliance Ltd (GDPC):

- Pharmaceutical industry expertise with excellent Microbiology, Virology and R&D capabilities. Our core team carry over 450 years of collective expertise within Pharmaceutical/Healthcare manufacturing industry.
- We have inhouse expertise in Technical design, Regulatory Affairs, Quality Assurance, Quality Control, Environmental remediation, process technology and innovation.
- Apply high pharmaceutical standards in product life cycle management. The pedigree of all ingredients verified and controlled. Stringent quality assurance principles applied across the manufacturing and packaging process to achieve highest quality standards.
- Our activities cover the full product spectrum ranging from product development to product commercialisation.
- All of our products are manufactured in United Kingdom.
- We operate under a fully established Quality Management system and our products are tested against all required specifications.
- We are dynamic, efficient and passionate. We genuinely care for our customers and our suppliers. We strive for ethical sourcing and fair pricing with our suppliers and customers.

Ultimately, our Scientists are passionate to provide genuine personal care solutions for our customers

Our Product

- ◆ Proven formulation
- ◆ Kind to hands with less abrasive chemicals
- ◆ Quality assured supply chain.
- ◆ Product is aimed to be 'fairly priced' for consumer to ensure long term sustainability.
- ◆ Available in a range of sizes: 100ml - 10L.
- ◆ All our products are quality control tested and provided with a specification and certificate of analysis.
- ◆ High quality UN approved bottles are used for 1L, 5L & 10L refill packs.
- ◆ We have our own branding for our products though are open to providing 'white label goods'.
- ◆ Further exciting products are currently in development.
- ◆ Manufactured and packed under Good Manufacturing Practice principles.
- ◆ Controlled by a robust Quality Management System.
- ◆ Quality Control testing performed right from raw materials to the finished products.
- ◆ Product independently tested for efficacy
- ◆ Distributed nationally and internationally.

Aqua Clean Hand Sanitiser

Alcohol Free Antiviral and Antibacterial Hand Sanitiser.

Free from fragrance and other toxic chemicals. Designed for fast acting and frequent use.

Non-flammable and non-sticky when dry.

Product Benefits

- Active against a wide range of Viruses and Bacteria
- Can be used repeatedly
- Alcohol & Fragrance free
- No dryness or irritation
- Non-Flammable
- 100% Triclosan free
- Can buy refill packs to reduce cost and long term usage
- Eco friendly Refill packs

Ingredient and specification

Ingredient

- Benzalkonium Chloride 0.2%
- Glycerol
- Propylene Glycol
- Phenoxyethanol
- EDTA
- Triethanolamine
- Aqua

Appearance: Clear, Colourless and Odourless

Physical state: Liquid

Solubility: Water soluble aqueous solution

pH: 7.0 to 8.0

Density (Kg/L): 1.02

Viscosity: Free flowing, similar to water

Active Ingredient

Benzalkonium chloride (BKC)

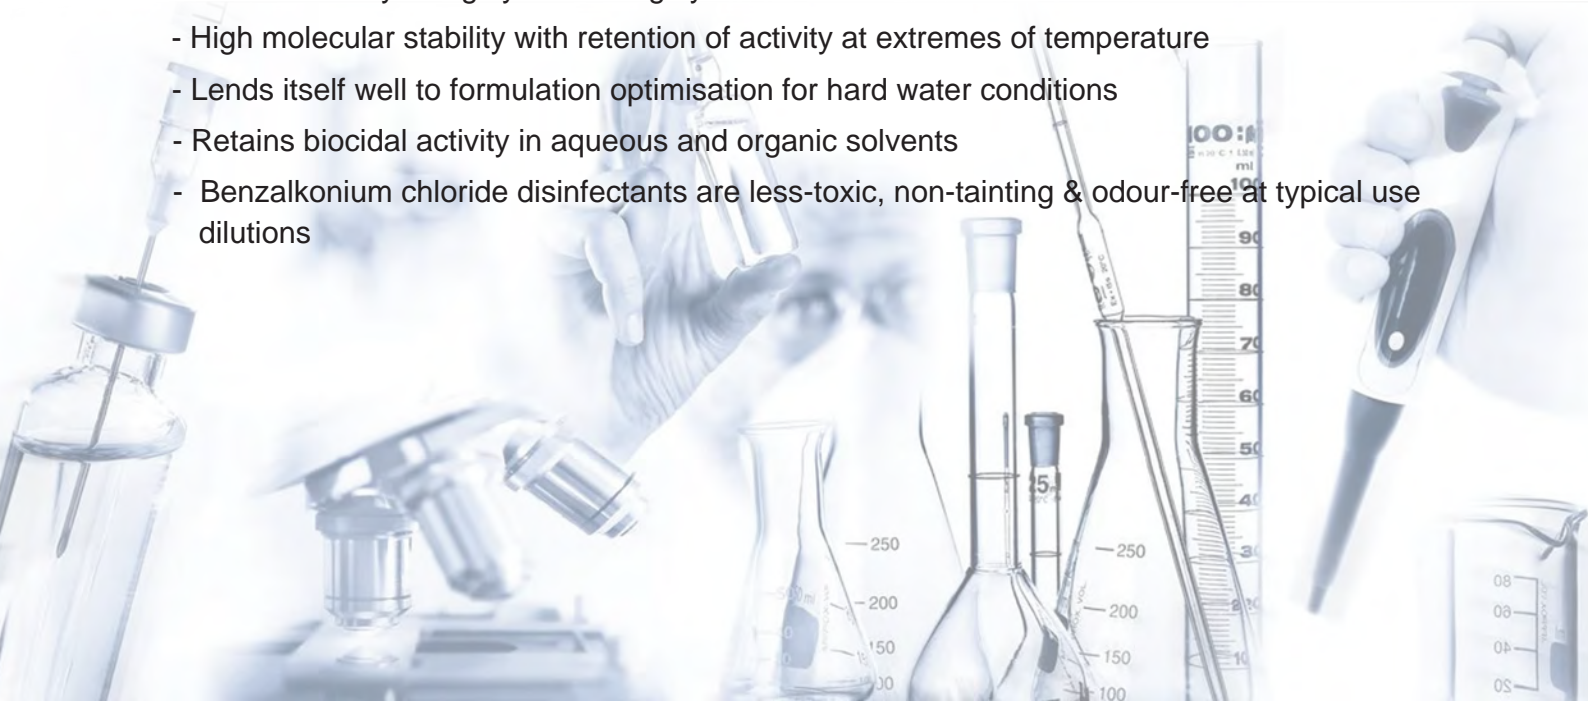

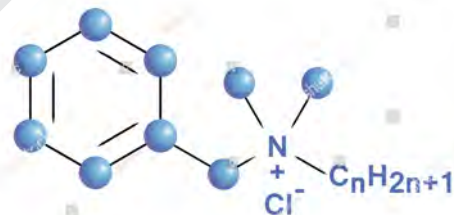

An advanced formulation of hand sanitiser with Benzalkonium chloride (BKC). The formulation has been carefully crafted by our in-house expert formulation specialists, to ensure the specialised disinfecting qualities and attributes of BKC is maintained to its highest effectiveness.

Benzalkonium chloride (BAK) is a common preservative used in ophthalmic medications and is the active ingredient in some skin disinfectants and hand sanitizers. BKC known to be effective in killing bacteria and enveloped viruses.

Alkyl dimethyl benzyl ammonium chloride (CAS no. 68424-85-1) has been pre-registered under REACH regulation and notified under the Biocidal Product Directive 98/8/EC .

Benzalkonium chloride is widely used in the formulation of disinfectants and cleaner sanitisers for the hospital, livestock, food & dairy and personal hygiene sectors.

- Offers rapid, safe, powerful antimicrobial activity at low ppm as per studies
- Strong detergency ensures ease of removal of organic soil which harbours microbes
- Ease of formulation for biocidal activity under high organic contamination conditions
- Compatible with non-ionic, amphoteric and cationic surface-active agents
- Displays synergistic activity with other classes of biocide & excipients
- Retains activity in highly acid to highly alkaline formulations
- High molecular stability with retention of activity at extremes of temperature
- Lends itself well to formulation optimisation for hard water conditions
- Retains biocidal activity in aqueous and organic solvents
- Benzalkonium chloride disinfectants are less-toxic, non-tainting & odour-free at typical use dilutions

Regulatory

Our Alcohol Free Instant Hand Sanitiser is compliant with the EU Biocidal Products Regulation (EU) 528/2012, Regulation (EC) No 1907/2006 and the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)(as amended), Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures.

- ▶ Will comply with the European Test BS EN 1276 killing 99.9% of germs in 30 seconds
- ▶ Will comply with BS EN 1500 Chemical disinfectants and Antiseptics
- ▶ Will comply with BS EN 13704:2002 and is effective against Clostridium Difficile.
- ▶ Will comply with BS EN14476: 2005 and is effective against Viruses
- ▶ Will comply with BS EN13624: 2013 and is effective against Fungal spores and Yeast.

Quality Assurance & Quality Control

Quality assurance is the pinnacle of GDP Compliance's product offering.

- ▶ All factories are audited and approved by GDP Compliance personnel.
- ▶ All products are tested using a government-approved independent third-party laboratory
- ▶ All products are placed on stability studies end of shelf life testing.
- ▶ Products are made under the supervision of QA with appropriate in-process control test being conducted.
- ▶ All sites operate under stringent quality systems. Activities are conducted under defined procedures (SOPs) with full documentation trails.
- ▶ We welcome any site audits or visits you may wish to conduct.

Know our Product

Is ASEPTIC Hand Sanitiser being safe children?

Yes, ASEPTIC Hand Sanitiser is safe and effective for everyone. Children under 6 years of age should be supervised when using any ASEPTIC product.

Is ASPETIC Hand Sanitiser drying to the hand?

No, Aseptic Hand Sanitiser will not dry our hand whilst frequent use.

Does Aspectic Alcohol free Hand Sanitiser kill iruses and bacteria?

Yes, Studies prove that our active ingredient Benzalkonium (0.2%) is effective against a wide range of viruses and bacteria

Does Aseptic Advanced Hand Sanitiser contain Triclosan?

No. Aseptic Advanced Hand Sanitiser does not contain Triclosan.

Can I use Aseptic Advanced Hand Sanitiser safely multiple times a day?

Yes, our product can be used repeatedly.

Do all Hand Sanitisers work the same?

No. When it comes to hand sanitising products, formulation matters. The active ingredient is important, but the total formulation affects the product's effectiveness. The product also has to deliver good skin care performance and be likeable to use.

When Should our Advanced Hand Sanitiser be used?

Our hand Sanitisers can be used when hands are not visibly soiled. If hands are visibly soiled, use soap and water.

Why should we keep our hands clean? Cruciality of Hygiene and Sanitising

Practicing good hand hygiene is especially important:

- *After using the bathroom*
- *Before eating or drinking anything*
- *Before and after handling raw foods, fish, poultry, or eggs*
- *After using a public phone*
- *After riding public transportation*
- *In schools and day care centers*
- *After changing nappies*
- *When one is sick*
- *After shaking hands*
- *After sneezing or coughing*
- *After touching bank machines, elevator buttons or escalator handrails*
- *Any other situation you suspect bacterial or Viral contamination of your hands*
